CSE 4940 Week 21 (Spring 2025) - Sage Pia

4/28/2025

This week, I made final edits to the video project before publishing it on our webform and submitting it for SoC judging. Additionally, I also began working on the poster we will display on Demo Day. I did the Background, Motivation, Future Goals, and Interface sections. I have the poster board in my dorm, so I will get it printed on Wednesday. Once that is done, we will have everything prepared for Demo Day. Our last task will be uploading all our files to GitHub.
