Since our last meeting, I have wanted to help design the UI. Using Yarid's previous design as a reference, I went to Figma to create a design. I felt it would be better to do it on Figma first and get the team's approval before coding it using HTML and CSS. Also, coding is more work, so I needed to make sure we really were okay with the design. I have designed other sites on Figma before, but I wanted this one to be more minimal and focused on the functionality. So, while it is pretty, it's also not too distracting. I definitely think it could still use more work (having the upload data available from any page, maybe improving the spacing). I designed the home, upload data and team page as a mockup. If we choose to continue, then I will be able to create some code that we can implement into the site (once it is combined with the two models).

Link to the prototype:

https://www.figma.com/proto/XAwXz3kbHJG8CAuiJf2aU2/SDP-Webpage-Mockup?node-id=2-2&p=f&t=hkv7BcB1LlwJFa9o-0&scaling=min-zoom&content-scaling=fixed&page-id=0%3A1&starting-point-node-id=2%3A2

You can press some text to go to another page like 'Upload Data', 'Meet the Team' and the title at the top to the page to go home.
